

# Testimonials

*"We installed the Biodynamizer a few months ago. Initially, it was mainly to protect our health from pesticides and endocrine disruptors present in tap water and to avoid having to buy bottles every week. Today, we realize how many benefits there are! **My skin is soft and my hair silky. I no longer need hand cream or any special care.** My friends are surprised and often ask me "what did I do?" Some of them have even gotten into the habit of refilling their bottles when they come over! Drinking energized water is a daily pleasure. We are delighted with it."*

**N.G Eghezée, Belgium**

*"I can only say that the **children** are drinking more water and they said it tastes the same as in Switzerland! 🇨🇭 And the shower is great. My skin no longer feels tight because of the salt in my softener!"*

**NVL, Rhode St. Genèse Belgium**

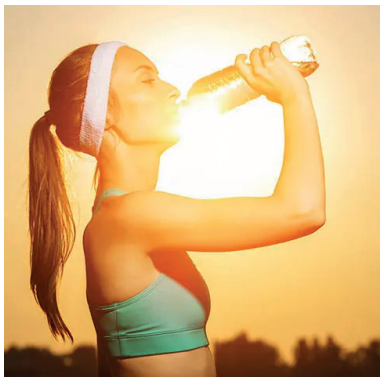

*"For almost a year, **Gordon**, an adorable ten-year-old German dachshund and faithful companion, has been drinking only energized water, both at home and during our hikes in the forest. Specifically, he no longer drinks tap water, which has an average vibrational content of just over 2,000 BU (Bovis Units), and drinks much more than before thanks to this energized water, which easily exceeds the 15,000 BU mark. Since Gordon's diet has improved, I've noticed that my dog has more vitality than before. As for me, I only drink energized water and eat exclusively organic, ethical, and local food, and I'm also in great shape. I advise all owners of dogs, cats, horses or others to share this pure and energized water with them because it is much more qualitative on a nutritional and vibrational level for the good health of our companions.*

**E A V. La Hulpe, Belgium**

*"Following the installation of the Biofilter and the Biodynamizer, the smell and taste of chlorine have disappeared, which is really very appreciable, both for my health and for the desire to drink enough every day. I've really noticed a **stronger desire to drink regularly throughout the day**. Before, I had to think about it and force myself, and now I don't have to think about it anymore; the desire is always there. [...] I decommissioned all my still water supplies (Evian because it came in glass bottles + spring water that we used to get from the heights of Lausanne) and kept two cases of sparkling water (Badoit) because I liked to drink it from time to time. With this new filtered water, I no longer have any attraction to this sparkling water; I instinctively drink this Biofiltered and Biodynamized water, and my stock of sparkling water has barely decreased in several months! I could also say that showers with this water are much more enjoyable. It's certainly much more pleasant and doesn't dry out the skin like it used to. [...] On the energy side, this water, combined with a healthy, balanced diet, gives me the "energy" for my intense sports activities, and therefore also for my usual daily activities.*

**Eric L. Switzerland, 2021**

*"I am happy with the filter and biodynamizer system. I tested it with my friend's pulse and the water that comes out of the tap is **vibrationally** excellent, as is the taste. I live in Crans Montana. My water was already good in terms of taste but not in terms of vibrational life. Energizing it has improved it."*

**Adèle R., Switzerland, 2021**

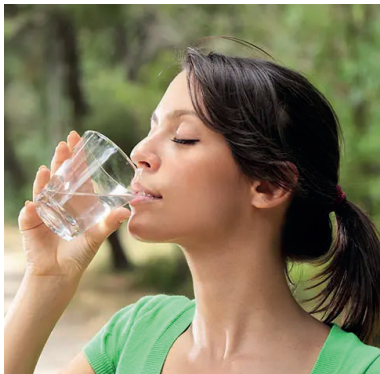

*"We've noticed privately that our **family kefir** production is doing wonderfully. The kefir grains are much larger than when we used unenergized water. We're also seeing a decrease in skin problems in the family."*

**L.J.P, Cottenchy, France**

*"Just to give some feedback on the Biodynamizer, people often ask me how I manage to make such beautiful and rich **sprouts** :-) So I refer them to the site to explain that I do this with the water that comes out of my tap installed with a Biodynamizer."*

**E.S, Waterloo Belgium**

*"I'm getting back to you because I'm thirsty💧 and I miss your water! It's incredible! I hadn't drunk it for a while. I tried other waters and 🤢yuck! Difficulty digesting them, nausea, no desire to drink them. I went to Bruno and Anne's on Monday and asked for a glass of water. I didn't know at first that it was your system. Bliss! I rediscovered that pleasure of the first sip when you came. **Light, sweet, digestible, better elimination, thirst again and a constant desire to drink.** A feeling of hunger too, which I haven't had for a long time. I wanted to share this little experience with you."*

*"We've actually noticed much softer, rounder water, which is very pleasant to drink (we're clearly drinking more water). There also seems to be less **limescale** on the shower walls. The showers are very pleasant, and the post-shower irritation and itching have disappeared."*

**Romain C., Switzerland, 202**

*"I had a **biogeologist** come to my house to analyze it. I placed two glasses on the table: one with the village's drinking water and a glass from my tap after it had passed through the Biofilter and the Biodynamizer. He simply circled the first glass (drinking water) and didn't find it of much interest. He then took the energized water. Without even drinking it, he found it radiated energy beyond the table!!! He found it magnificent even before putting it in his mouth. And the best part: he asked me if it wasn't spring water! Isn't that exactly what we're looking for! He then really liked the taste. He's a water professional and isn't familiar with the system. He's interested in installing it."*

**Pierre C., Switzerland, 202**

---

*"The feedback is very good: **Very good quality and light taste in the mouth (no more chlorine smell), easy to drink and therefore better hydration** (before I forced myself to finish my liter a day). Less itchy skin. And it must be said that having quality water directly from the tap is a real comfort for the whole family!"*

**Fabio B., Switzerland, 202**

*"[...] it may seem secondary, but for us it's not a detail; I hardly ever buy bottled water anymore (still exceptionally when we sometimes have guests over). Whereas we used to only drink bottled water because tap water tasted bad, we now **only drink tap water**. I put it in a carafe and I really feel like I personally drink it more spontaneously than before. I can also share another detail, but I can't say whether the water is the cause, or at least the only cause: my husband's psoriasis is less noticeable on his elbows, where it has been persistent for years."*

**Patricia H., France, 2020**

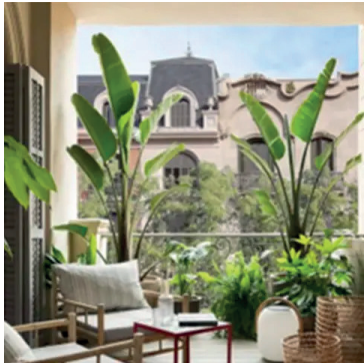

*"I am fully satisfied with the Biodynamiseur, both in terms of taste. We literally enjoy drinking water, and even my dog, who didn't drink water often, I find him drinking more. That's saying something! I already had a geothermal shower head, and yet I still noticed a change after **showering**, with softer skin that was less prone to irritation. Furthermore, as a resident of northern France with a limescale index close to 40 degrees, I have also noticed a reduction in limescale traces and the formation of limescale in all my water points. It is therefore with great pleasure that I talk about it to those around me."*

*receptive people on this subject. A big thank you to you for this product as well as the benefit and well-being that it provides in terms of comfort, health, and inner balance.*

**Aurélien L., France,2020**

---

*"We are delighted with this new water. I drink tap water more than before because it is so much better. In terms of vitality, I couldn't tell you because this period is so troubled that other factors are added... Our **plants** seem to be thriving very well with their new watering!"*

**Sophie F., Switzerland,202**

*"I am satisfied with the bio-dynamizer; the water is much softer and more pleasant. I see a significant difference in my **skin.**"*

**Isabelle A., France,2020**

---

*"My ex used biodynamic water on two **plants** in the living room (rubber plants) that were at least 20 years old and had never been repotted or re-soiled, just water. Well, they became vibrant."*

**Thierry M.France, 2021**

*"The **quality of my bread** has improved significantly in terms of consistency of production, smoothness of the dough, the appearance of the bread and the taste, which is more pronounced, particularly for sourdough bread."*

**Baker F.M. Mouscron Belgium, 2021**

*"The **coffee** has a darker color, a greater expression of aromas, a wider taste and olfactory palette in terms of intensity and richness, meaning a taste with more varied flavors, a longer length in the mouth, a better balance between bitterness and acidity and a nose developing more varied aromas."*

**Coffee Brewmaster & Coffee Quality Grader, 2022**

*"The batch of **alfalfa** that I blindly gave to my friends and family had a unanimously better taste in the comments."*

**R.S. market gardener in Dixville, Québec, Canada**

*"I would like to take this opportunity to express my complete satisfaction with the Biodynamizer, which, in addition to my domestic needs, allowed me to water a 300m<sup>2</sup> **vegetable garden** during this disastrous summer, with an hour and a half of watering (between 7:30 p.m. and 9:00 p.m.) every three to five days (combined with organic hay mulch), even during the worst drought ever experienced in our Marais Poitevin region. I never used water from my well, given the lushness of our plants and the harvest with this type of targeted watering at the vegetable roots. My neighbors, who watered every evening for a meager harvest, asked us for our method, which allowed me to give you some well-deserved publicity."*
